

LV1871 Java Coding Dojo

Chatbot leichtgemacht – Sterbegeldrechner 4.0

München, 03. Mai 2018

Nicolai Erbs (INFOMOTION) und Erik Langenhan (IBM)

Agenda

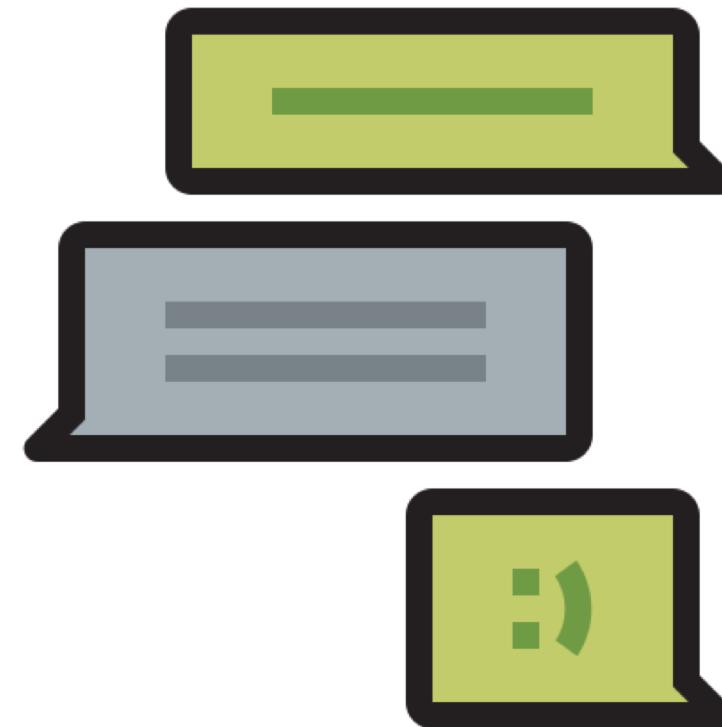

Einführung

- › INFOMOTION
- › IBM Cloud (Watson Assistant)
- › Chatbots
- › Registrierung IBM Watson
- › Chatbot mit Watson Assistant
- › Integration in ein Orchestration Layer
- › Anbindung an die LV1871 API
- › Erweiterungen
- › Wie geht es weiter?
- › Lessons Learned
- › Watson im Weltall

Entwicklung Chatbot

Wrap-up

Vorstellung

INFOMOTION: Unser Erfolgsgeheimnis? We love data!

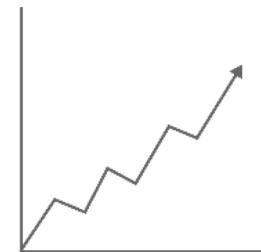

BUSINESS INTELLIGENCE, BIG DATA & DIGITAL SOLUTIONS

Office Hilfe der 90er

Der Anfang von Chatbots: Karl Klammer

It looks like you're writing a letter.
Would you like help?

- Get help with writing the letter
- Just type the letter without help

 Don't show me this tip again

It looks like you're trying to work. Would you like me to bug you instead?

- Annoy me till my eyes bleed
- Go away please

Sprachassistenten

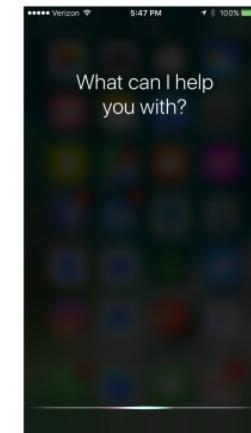

Amazon, Apple, Google, Microsoft & Co.

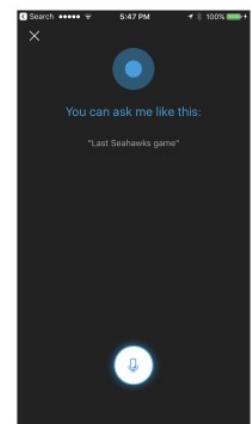

AMAZON'S ALEXA

GOOGLE'S ASSISTANT

APPLE'S SIRI

MICROSOFT'S CORTANA

Einsatzgebiete von Chatbots

- › Beratung bei Kaufentscheidungen
- › Verarbeitung von Bestellung

E-Commerce

Entscheidungs- unterstützung

- › Faktenbasis abfragen
- › IT-Helpdesk für häufige Anfragen

- › Direkte Antworten bei Anfragen
- › Öffnung weiterer Kanäle

Marketing

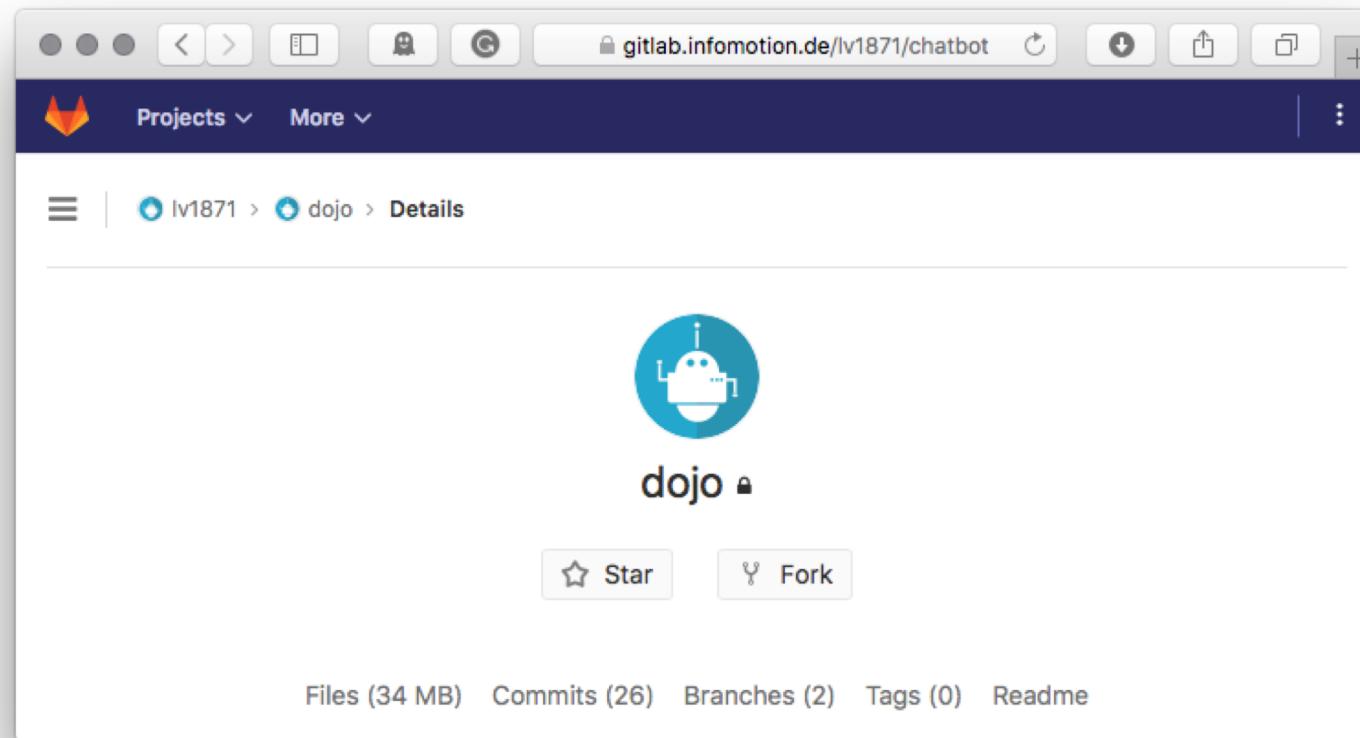

Suchwerkzeug

- › Suche nach Kontaktdataen
- › Integration auf Websites

Ziel des Dojos: Entwicklung eines vollständigen Chatbots

Alle Informationen zum Nachlesen

<https://github.com/INFOMOTION/dojo-chatbot>

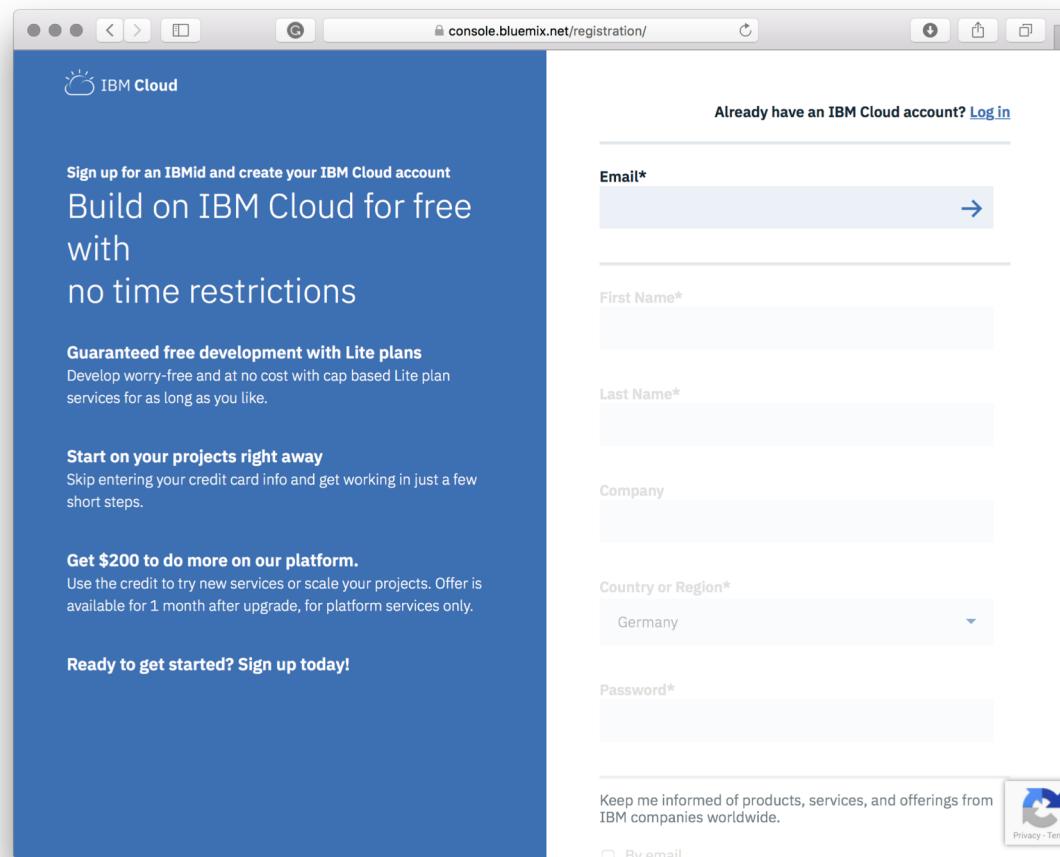

Zeitplanung Katas

Dauer	Kata	Beschreibung
20 min	Erstelle einen Watson Assistant Dialog	<ul style="list-style-type: none"> • Dialog erstellen • Intents & Entities verbessern • Testen mit Try-out
20 min	Verbinde Watson Assistant mit dem Orchestration Layer	<ul style="list-style-type: none"> • Integration der Watson SDK • Anbindung an Watson Assistant • Übergabe von Kontextvariablen
20 min	Verbinde den Sterbegeldrechner mit der API der LV1871	<ul style="list-style-type: none"> • Anbindung API LV1871 • Berechnung des Beitrags
20 min	Erweitere das System	<ul style="list-style-type: none"> • Logging • „Chit Chat“ • Actions

Kata 1

IBM Cloud Registrierung I

The screenshot shows the IBM Cloud registration page at console.bluemix.net/registration/. The left side of the page has a blue background with white text, while the right side is a standard registration form.

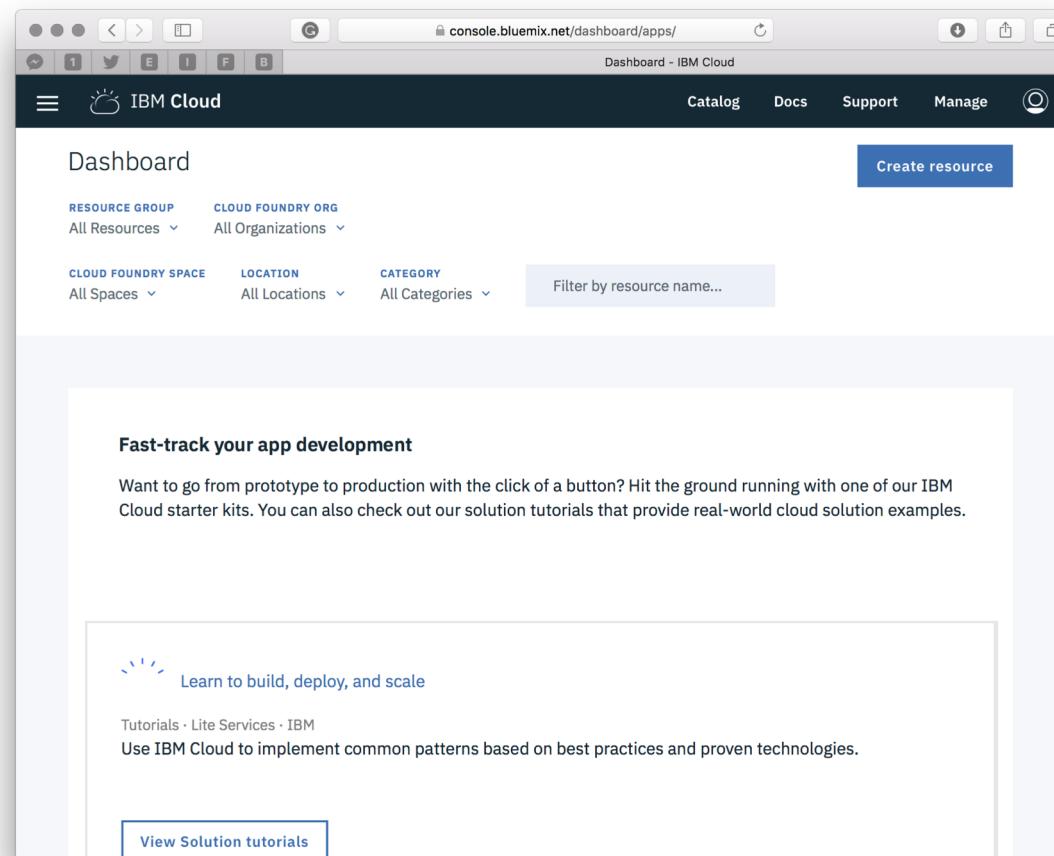

Left Side (Blue Background):

- IBM Cloud logo:** A small icon of a cloud with a gear inside.
- Text:** "Sign up for an IBMid and create your IBM Cloud account".
- Text:** "Build on IBM Cloud for free with no time restrictions".
- Text:** "Guaranteed free development with Lite plans".
- Text:** "Develop worry-free and at no cost with cap based Lite plan services for as long as you like."
- Text:** "Start on your projects right away".
- Text:** "Skip entering your credit card info and get working in just a few short steps."
- Text:** "Get \$200 to do more on our platform.".
- Text:** "Use the credit to try new services or scale your projects. Offer is available for 1 month after upgrade, for platform services only."
- Text:** "Ready to get started? Sign up today!".

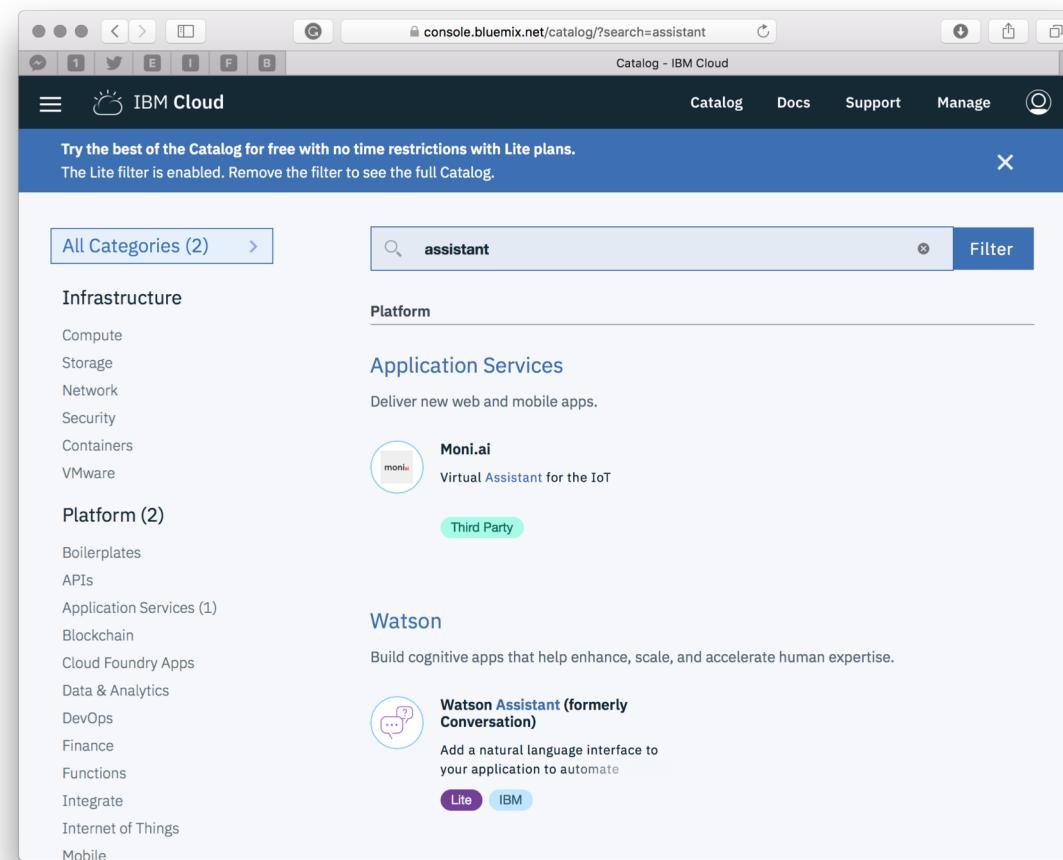

Right Side (Form Fields):

- Email***: An input field with a right-pointing arrow button.
- First Name***: An input field.
- Last Name***: An input field.
- Company**: An input field.
- Country or Region***: A dropdown menu set to "Germany".
- Password***: An input field.
- Checkboxes:** "Keep me informed of products, services, and offerings from IBM companies worldwide." and "By email".
- Buttons:** A "C" logo button and "Privacy - Terms".

IBM Cloud Registrierung II

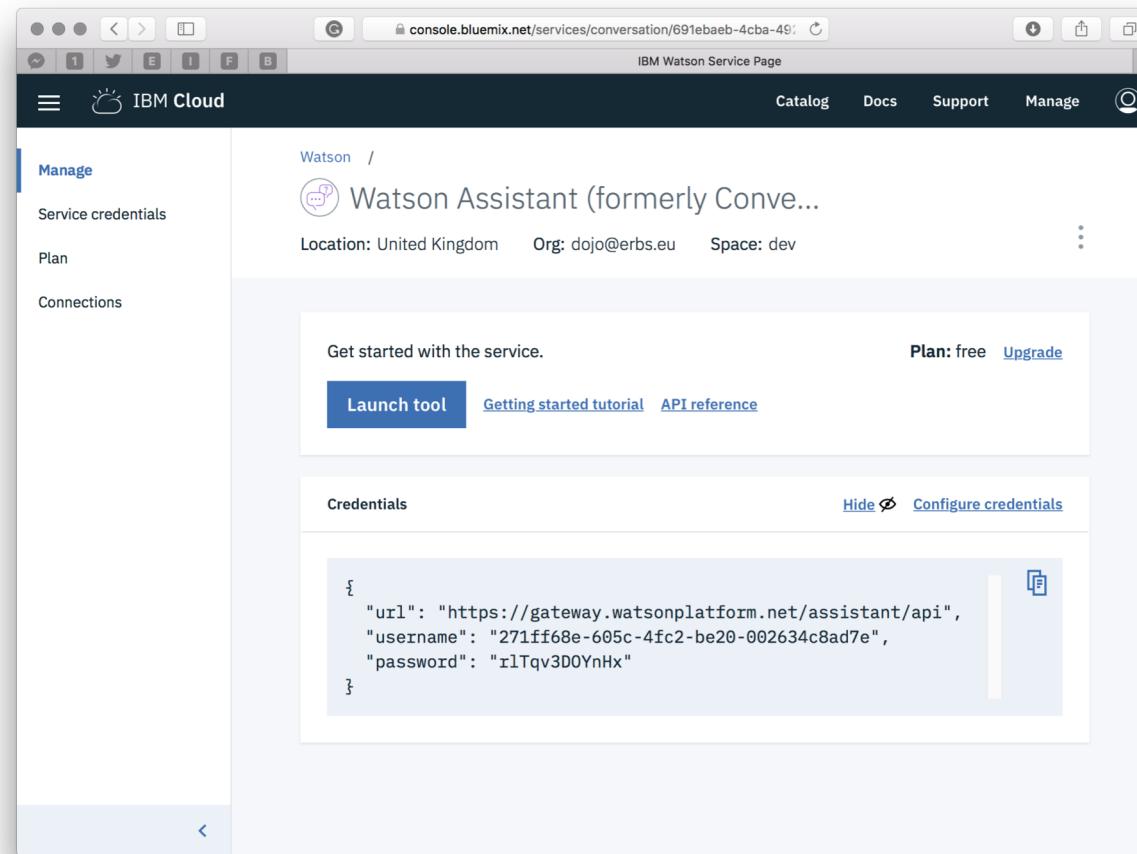

IBM Cloud: Watson Assistant I

The screenshot shows the IBM Cloud Catalog interface. At the top, there is a banner message: "Try the best of the Catalog for free with no time restrictions with Lite plans. The Lite filter is enabled. Remove the filter to see the full Catalog." Below the banner, there is a search bar with the word "assistant" typed into it, and a "Filter" button. To the left, there is a sidebar with categories like Infrastructure (Compute, Storage, Network, Security, Containers, VMware) and Platform (2) (Boilerplates, APIs, Application Services (1), Blockchain, Cloud Foundry Apps, Data & Analytics, DevOps, Finance, Functions, Integrate, Internet of Things, Mobile). On the right, there is a main content area for "Application Services" featuring a service called "Moni.ai" which is described as a "Virtual Assistant for the IoT". Below that, there is a section for "Watson" with a sub-section for "Watson Assistant (formerly Conversation)". It is described as "Build cognitive apps that help enhance, scale, and accelerate human expertise." A note says "Add a natural language interface to your application to automate". There are "Lite" and "IBM" buttons at the bottom of this section.

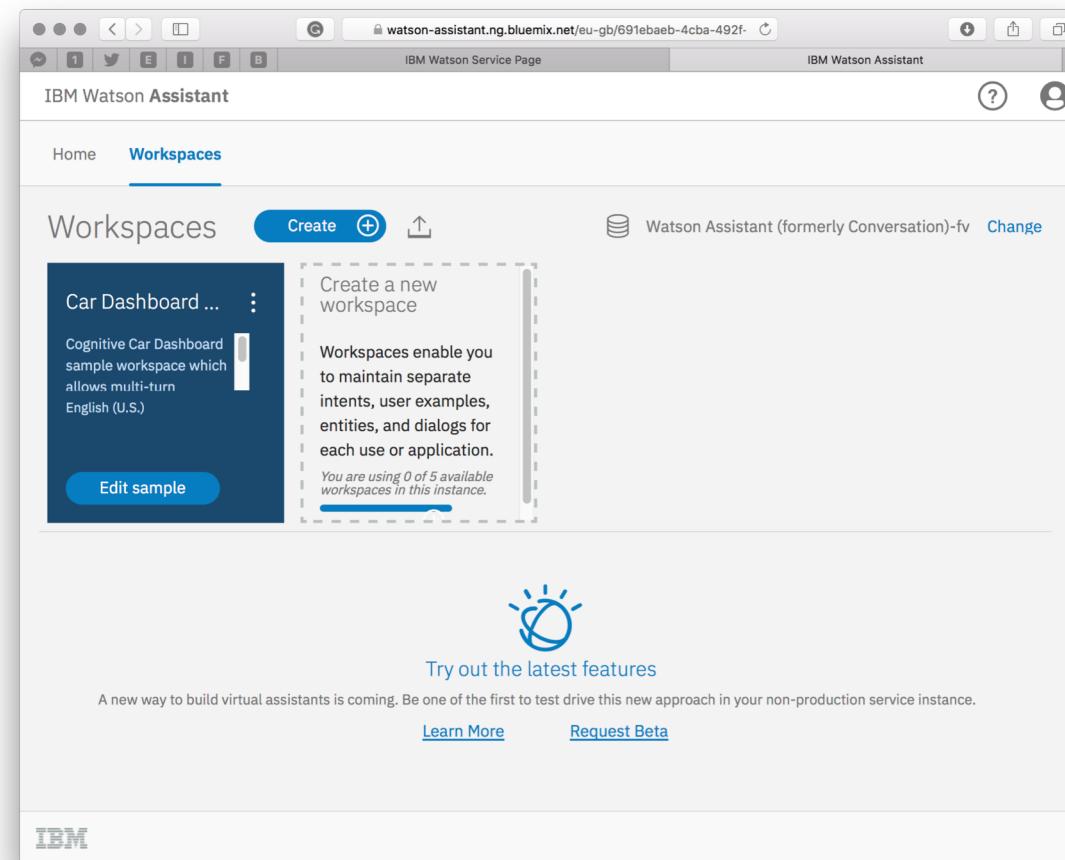

IBM Cloud: Watson Assistant II

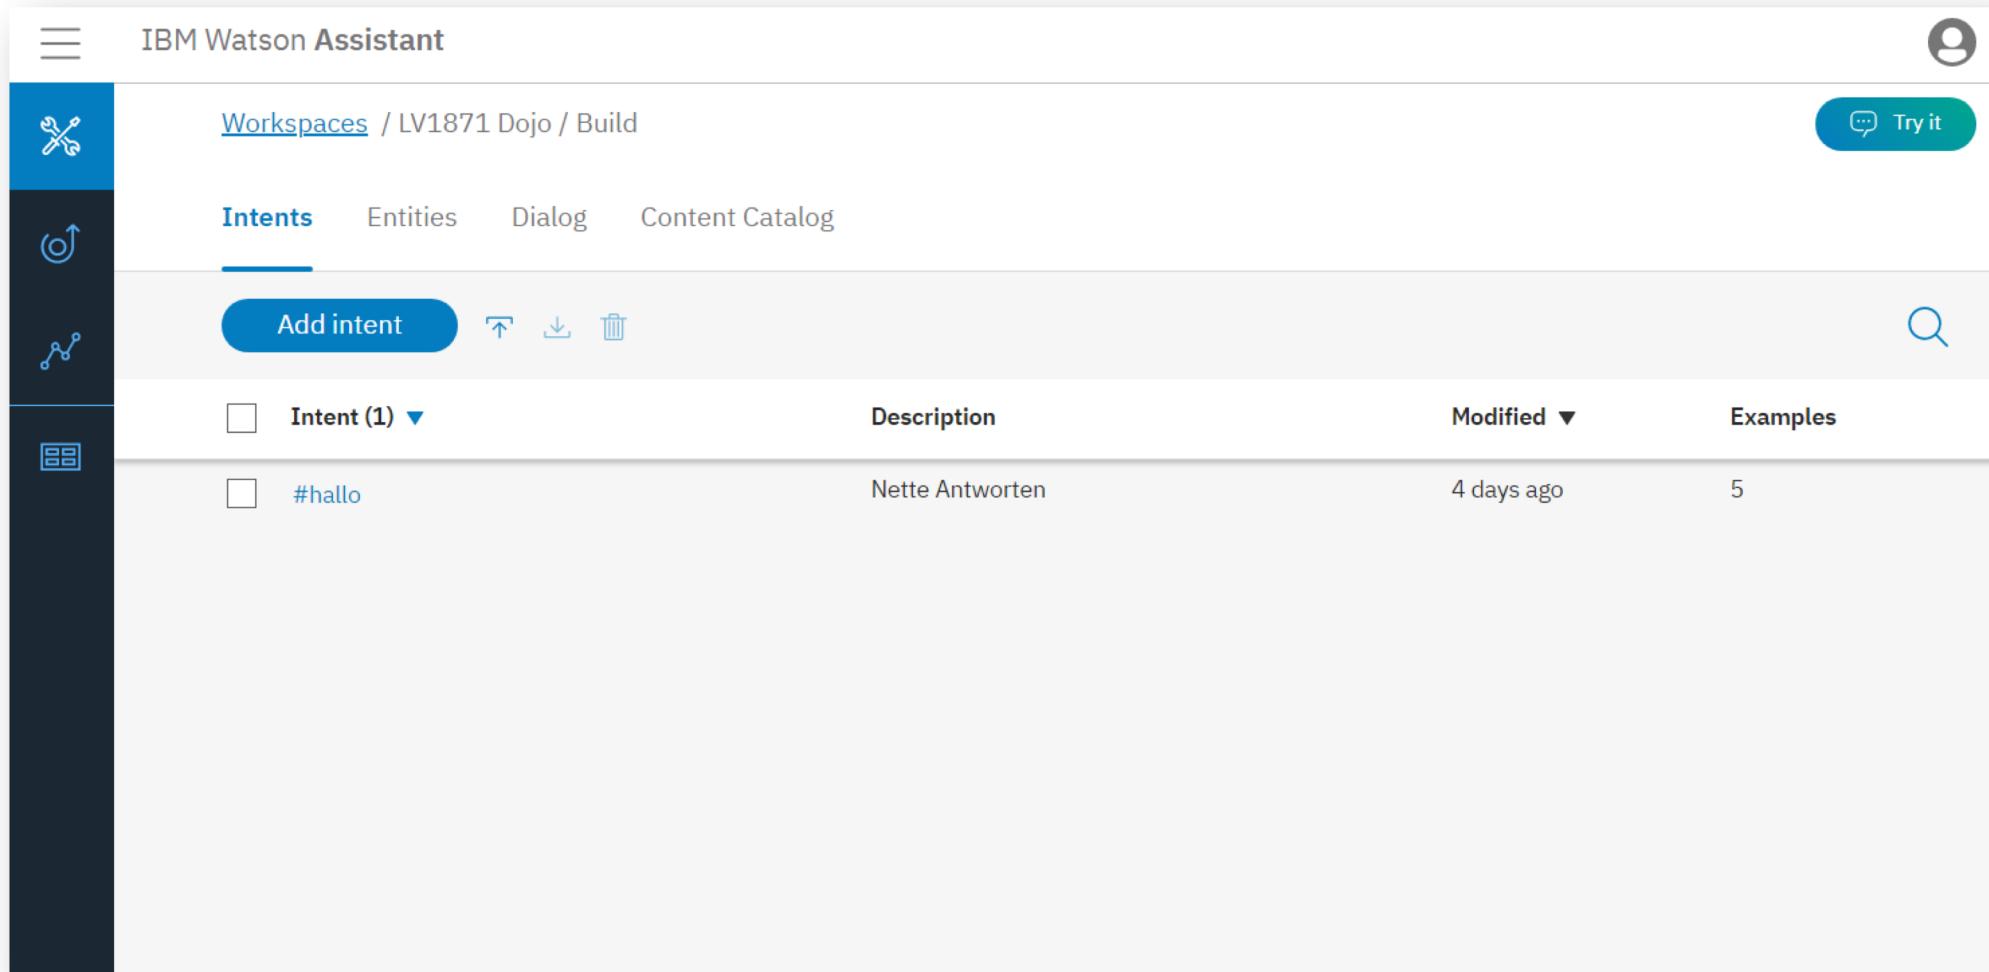

The screenshot shows the IBM Cloud Watson Assistant service page. The URL in the browser is `console.bluemix.net/services/conversation/691ebaeb-4cba-49...`. The page title is "IBM Watson Service Page". On the left, there's a sidebar with "Manage" selected, showing "Service credentials", "Plan", and "Connections". The main content area has a header "Watson / Watson Assistant (formerly Conve...)" with location "United Kingdom", org "dojo@erbs.eu", and space "dev". Below this, a "Get started with the service." section includes a "Plan: free" button and "Upgrade" link. A "Launch tool" button is highlighted in blue. Under "Credentials", there's a "Hide" link, a "Configure credentials" link, and a JSON snippet:

```
{  
  "url": "https://gateway.watsonplatform.net/assistant/api",  
  "username": "271ff68e-605c-4fc2-be20-002634c8ad7e",  
  "password": "rlTqv3D0YnHx"  
}
```

IBM Cloud: Watson Assistant III

Kurzeinführung Watson Assistant

The screenshot shows the IBM Watson Assistant interface. The top navigation bar includes a menu icon, the title "IBM Watson Assistant", a user profile icon, and a "Try it" button. Below the title, the current workspace is shown as "Workspaces / LV1871 Dojo / Build". The main navigation tabs are "Intents", "Entities", "Dialog", and "Content Catalog", with "Intents" being the active tab. A prominent blue button labeled "Add intent" is located in the center of the screen. Below this, a table lists the intents. The first intent is named "#hallo" and has a description of "Nette Antworten", was modified 4 days ago, and has 5 examples.

	Description	Modified	Examples
<input type="checkbox"/> Intent (1) ▾	Nette Antworten	4 days ago	5
<input type="checkbox"/> #hallo			

Kata 1: Watson Assistant

PROBLEMBeschreibung

- › Erstelle einen Workspace oder importiere das Template
- › Erstelle einen einfachen Dialog
- › Erweitere Intents und Entities

Hinweise

- › Intents sind die Verben des Chatbots
- › Entities sind die Substantive des Chatbots

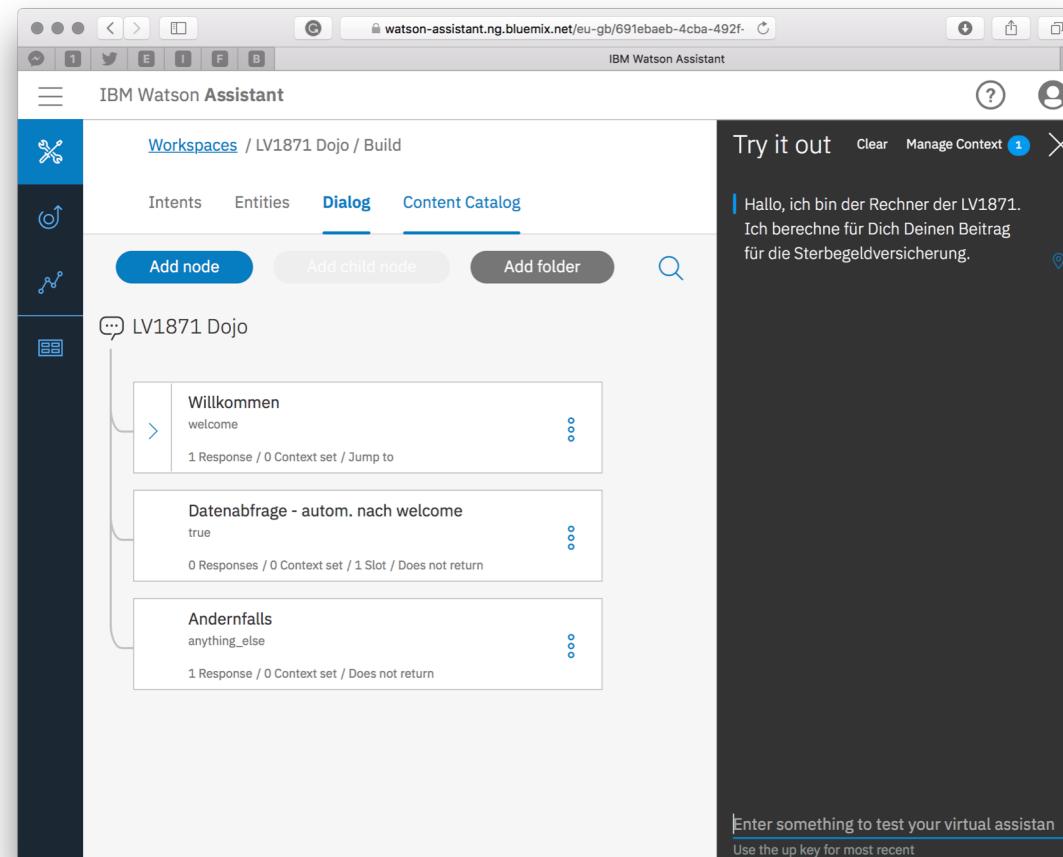

Anwendungsfälle

- › Nutzer wird nach der Summe für Sterbegeld gefragt
- › Eingegebene Summe wird erkannt und im Kontext gespeichert

Ressourcen

- › Template: https://github.com/INFOMOTION/dojo-chatbot/tree/master/Templates/dojo_template.json
- › www.ibm.com/watson/how-to-build-a-chatbot

Kata 1: Watson Assistant

Komplette Lösung:

https://github.com/INFOMOTION/dojo-chatbot/tree/master/Musterlösungen/dojo_solution.json

Kata 2

Kata 2: Orchestration Layer

PROBLEMBeschreibung

- › Importiere die Musterlösung des Chatbots in WA
- › Importiere das Template des Orchestration Layers
- › Füge Workshop-ID ein
- › Nutze Konsole als User Interface zu WA

HINWEISE

- › Verifiziere die Installation mit JUnit Test Cases
- › Erweitere den JUnit Testfall für WA

ANWENDUNGSFALL

- › Nutzer kann über die Konsole mit WA kommunizieren

RESSOURCEN

- › Template: https://github.com/INFOMOTION/dojo-chatbot/tree/master/Templates/java_template.zip
- › <https://github.com/watson-developer-cloud/java-sdk>

Kata 2: Orchestration Layer

Bot: Hallo, ich bin der Rechner der LV1871. Ich berechne für Dich Deinen Beitrag für die Sterbegeldversicherung.
Bot: Um eine Berechnung vorzunehmen benötige ich folgende Informationen von dir: Mit wie viel Sterbegeld möchtest du planen? Und ab wann möchtest du abgesichert sein?

User: Ich brauche 1000€

```

Komplette Lösung:

https://github.com/INFOMOTION/dojo-chatbot/tree/master/Templates/java_context.zip

Kata 3

Kata 3: LV 1871 API

PROBLEMBeschreibung

- › Die Summe für das Sterbegeld wird aus dem Kontext ausgelesen
- › Der monatliche Beitrag für die Sterbegeldversicherung wird berechnet

HINWEISE

- › Grenze die minimale und maximale Höhe des Wertes ein
- › Nutze JUnit-Tests

ANWENDUNSFALL

- › Bei Eingabe der Sterbegeldsumme, Startdatum und Geburtsdatum wird der monatliche Beitrag ausgegeben

RESSOURCEN

- › www.lv1871.de/lv1871_internet/sterbegeldversicherung.htm#/?versicherungssumme=9000
- › Template: https://github.com/INFOMOTION/dojo-chatbot/tree/master/Templates/java_context.zip

Kata 3: LV 1871 API

```
public class ApiConnectorTest {  
  
    private ApiConnector api;  
  
    @Before  
    public void setUp() throws Exception {  
        api = new ApiConnector();  
    }  
  
    @Test  
    public void test() {  
        double rate = api.calculateRate(10000, "1974-11-24", "2018-04-24");  
        Assert.assertEquals(34.45, rate, 0.0001);  
    }  
}
```

Komplette Lösung:

https://github.com/INFOMOTION/dojo-chatbot/tree/master/Templates/java_lv1871api.zip

Kata 4

Kata 4: Erweiterungen

PROBLEMBeschreibung

- › Bringe dem Chatbot Chit Chat bei
- › Logge Ein- und Ausgaben
- › Füge eine UI hinzu
- › Erstelle einen Backup des Workspace
- › Berechne und übergebe den monatlichen Beitrag mittels actions

HINWEISE

- › Es darf keinen einzelnen Intent mit allen Chit Chats geben (Dominanz eines Intents)

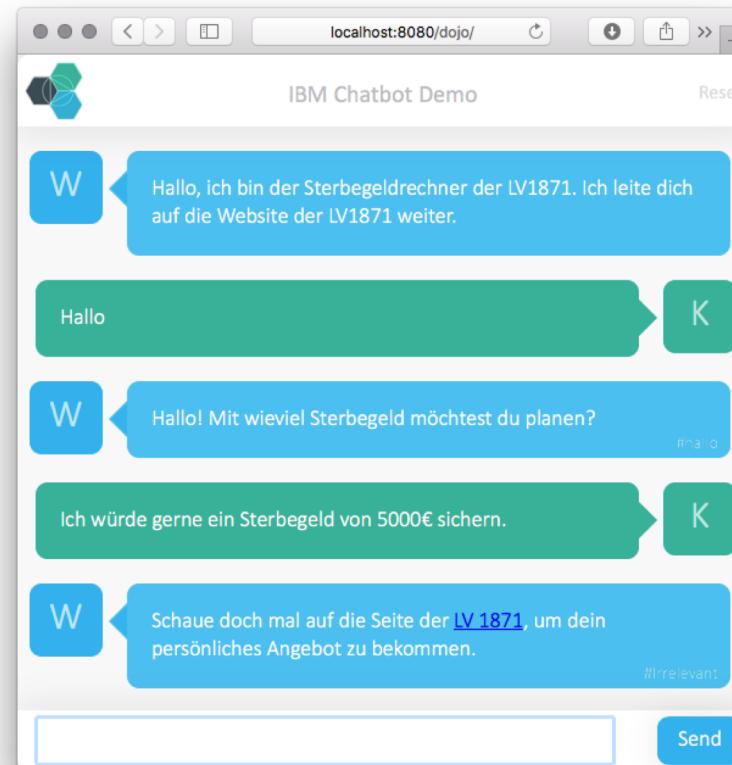

ANWENDUNGSFÄLLE

- › Der Monatsbetrag wird direkt an Assistant übergeben
- › Chatbot beantwortet eine Frage zum Wetter
- › Nutzer chattet über eine UI
- › Administrator kann den Chatverlauf in der Datenbank nachverfolgen

RESSOURCEN

- › Template: https://github.com/INFOMOTION/dojo-chatbot/tree/master/Templates/java_lv1871api.zip
- › GUI: <https://git.ng.bluemix.net/insdach/chatbot-template>

Kata 4: Erweiterungen

Komplette Lösung:

https://github.com/INFOMOTION/dojo-chatbot/tree/master/Musterlösungen/java_actions.zip

Wrap-up

Erweiterungen

Chatbot

- › Weitere Parameter abfragen
- › Weitere Versicherungen anbieten und danach fragen
- › ...

Orchestration Layer

- › Anbindung von weiteren Einstellungen des Online-Rechner
- › Feedback auf Basis von Kundenprofilen
- › ...

Sonstiges

- › Integration in WhatsApp und andere Messenger
- › ...

Lessons Learned

- › Architektur eines Chatbots
- › Watson Assistant als erweiterbare Lösung
- › Anbindung an einen Orchestration Layer
- › ...
